

Reflection

Candidate ID Number: 1234

Case Study Number : Case Study 1 Case Study 2

Explain any significant challenges you experienced related to the wheelchair and PSDs while setting up the PSDs or while doing the fitting. How did you address these challenges?

Not applicable _____

Critically look back at the assessment, prescription, and final fitting. Identify and list all/ any errors and/or omissions.,

1. I realise that the foam blocks added on the sides of the wheelchair to narrow the seat are too high. They should not be higher than the top of the pelvis. _____
2. On reflection, I would like to check the height of the open seat to back angle wedge again to make sure it is high enough. _____

List the actions you will take to address the errors/omissions identified above:

I will make the necessary adaptations to the foam blocks on the side of the wheelchair at the follow up visit. _

I would also like to again check the height of the open seat to back angle wedge to ensure it completely fills the space behind the pelvis and the lower back to the curve of the spine. If too low I will replace the current wedge with a higher wedge. _____
